ÉDITO

du Président

Chers Amis, Chers Confrères,

C'est un immense plaisir pour tous les membres du Bureau de voir le 48^e congrès de notre Société se concrétiser à Lausanne ! Enfin !

Comme vous pouvez certainement l'imaginer, la pandémie de laquelle nous sortons a grandement complexifié l'organisation de cet évènement. C'est en particulier grâce à l'implication énergique et à la ténacité de quelques acteurs-clé que notre prochaine réunion pourra avoir lieu.

J'aimerais premièrement remercier Eliane Roulet Perez, et le Comité d'organisation local, qui ont imaginé un magnifique programme animé par des orateurs prestigieux. Leur enthousiasme indéfectible a permis de franchir tous les obstacles administratifs et logistiques rencontrés depuis 2020, et croyez-moi, cela n'a pas été aisément !

Sur ces mêmes points, je souhaite mettre en avant l'assistance extraordinairement efficace de Nathanaelle Touchon, Aurélie Perez Caballero, et toute l'équipe d'ANT congrès, notre fidèle secrétariat sans lequel le congrès n'aurait pas pu se tenir dans de telles conditions.

J'adresse également mes sincères remerciements à tous les orateurs invités, qui sans exception ont maintenu leur volonté de participer activement et de partager leur savoir avec nous, malgré

les multiples modifications des dates du congrès.

Je remercie chaleureusement nos sponsors, dont le soutien indéfectible permet la tenue de cette réunion sans aucun changement majeur de structure depuis qu'elle a été envisagée en 2019.

Je tiens, enfin, à saluer le travail de fond réalisé au cours de cette période difficile par mes collègues et amis du Bureau actuel, Elisa Fazzi, Antoinette Bernabe, Conxita Escofet, Pierangelo Veggiani, François Rivier et Alec Aeby. Nos activités et réflexions récentes ont non seulement porté sur la planification de nos futures réunions annuelles, et sur l'organisation de séminaires à distance, mais aussi sur le fonctionnement de la Société, et sur le rôle de celle-ci au sein du paysage scientifique européen. Ce travail, que nous menons avec vous depuis plusieurs années, a été grandement complexifié par l'impossibilité de nous réunir en personne. Certaines des missions que vous nous aviez confiées ont néanmoins pu aboutir, et feront l'objet d'une présentation lors de l'Assemblée Générale prévue le 18 mars, à laquelle tous les membres sont conviés.

Au nom du Bureau, je vous souhaite le meilleur des congrès à Lausanne !

Christian KORFF
Président

ÉDITORIAL

President

Dear Friends, Dear Colleagues,

It is a great pleasure for all the members of the Bureau of our society to see that the 48th congress will finally take place in Lausanne! At last!

As you can imagine, the pandemic has greatly complicated the organization of this event.

We want to address some «special thanks» to the energetic involvement and tenacity of a few key players who have had a major role in making it come true.

First, I would like to thank Eliane Roulet Perez, and the local organizing committee, who imagined a magnificent program with prestigious speakers. Their ongoing enthusiasm has made it possible to overcome all the administrative and logistical obstacles encountered since 2020, and believe me, it has not been easy!

On this same level, I would like to highlight the extraordinarily efficient assistance of Nathanaelle Touchon, Aurélie Perez Caballero, and the entire ANT congres team, our faithful secretariat, without whom the congress could not have been held in such conditions.

I also extend my sincere thanks to all our guest speakers, who all have kept their agenda open to actively participate and share their expertise with us, despite the many postponements.

I warmly thank our sponsors, whose unfailing support has made it possible for this meeting to take place without any major changes since it was first planned in 2019.

Finally, I would like to highlight the substantial work carried out during this difficult time by my colleagues and friends in the current Bureau, Elisa Fazzi, Antoinette Bernabe, Conxita Escofet, Pierangelo Veggiotti, François Rivier and Alec Aeby.

Our recent activities and reflections have not only focused on the planning of our future annual meetings and on the organization of remote seminars, but also on the functioning of the Society, and on its role within the european scientific field.

This work, which we have been carrying out with you for several years, has been greatly impacted by the impossibility of meeting in person since March 2020.

Some of the missions that you had entrusted to us were nevertheless able to succeed and will be presented at the General Assembly scheduled for March 18 and to which all members are invited.

On behalf of the Bureau, I wish you the best of congresses in Lausanne!

Christian KORFF
President

ÉDITO

du Comité d'organisation

Chers collègues et amis,

Il n'y a jamais deux sans trois et le troisième essai sera le bon : qui aurait pensé que ces deux dictons s'appliqueraient un jour à notre Congrès de la Société Européenne de Neurologie Pédiatrique ! Notre nouveau Président, le Bureau et le Comité local auront d'autant plus de plaisir à vous accueillir ce printemps à Lausanne que l'attente aura été longue depuis 2020.

Notre lieu de réunion a aussi changé pour la troisième fois : nous serons reçus au Centre de **Congrès de Beaulieu** où nous pourrons oublier virus et contraintes liées à nos hôpitaux. Espérons que le temps nous permettra de voir les Alpes enneigées par les fenêtres et même de sortir dans le parc.

Heureusement que les sujets que nous avions choisis sont intemporels et que nos orateurs invités ont tous accepté de maintenir leur participation. Grâce à eux, le programme initial a pu rester inchangé. Nous débuterons donc notre réunion le jeudi 17 mars par le cours destiné aux pédiatres puis nous aborderons les deux thèmes principaux : le vendredi sera consacré au « langage de l'enfant dans des circonstances exceptionnelles ». Nos orateurs parleront du développement et de l'organisation du langage lors de lésions cérébrales acquises, de malformations, de troubles du développement d'origine génétique ou encore de certaines formes d'épilepsies. Le samedi, nous traiterons des

« épisodes paroxystiques du petit enfant », incluant le nouveau-né : il y a toujours du nouveau dans ce domaine où le bénin et le redoutable se côtoient et où le diagnostic et le traitement restent souvent un défi, même avec les aides technologiques. La neurologie pédiatrique générale sera aussi de la partie avec les communications libres et les posters.

Nous remercions de tout cœur nos orateurs et nos sponsors de nous être restés fidèles malgré les obstacles ainsi que ceux qui présenteront leurs travaux et tous les participants : grâce à vous tous, la réunion sera passionnante et nous repartirons avec de nouvelles connaissances, de nouvelles idées et enrichis de nos échanges « en direct ».

Nous espérons que vous trouverez aussi un peu de temps pour vous promener en ville ou au bord du lac où aura lieu la visite du musée Olympique et le dîner de la Société le vendredi 18.

Profitez tous de votre congrès à Lausanne !

Eliane Roulet Perez
Christopher Newman

Claudia Poloni

WELCOME

to Lausanne

Dear colleagues, dear friends,

There is never two without three and the third try will be the right one. Who would have thought that these two sayings would one day apply to our Congress of the Société Européenne de Neurologie Pédiatrique ! The new President of our society, the Board and the Local Committee will be all the more pleased to welcome you this spring in Lausanne as the wait has been long since 2020.

Our venue has also changed for the third time: we will be hosted at the **Beaulieu Congress** Centre where we can forget about viruses and constraints linked to our hospitals. The weather will hopefully allow us to see the snow-covered Alps through the windows and even to go out into the park.

Fortunately, the topics we have chosen are timeless and our guest speakers have all agreed to maintain their participation. Thanks to them the initial program has been kept unchanged. We will therefore start our meeting on Thursday 17 March afternoon with the teaching course for paediatricians and then move on to the two main topics: Friday will be devoted to “the child's language in exceptional circumstances”. Our speakers will discuss the development and organization of language in acquired brain damage, malformations, developmental disorders of

genetic origin and some types of epilepsy. On Saturday, we will deal with “paroxysmal episodes in young children”, including newborns: there is always something new in this field, where the benign and the fearsome meet and where diagnosis and treatment often remains a challenge, even with technological aids. General pediatric neurology will also be on the agenda with free communications and posters.

We are very grateful to our speakers and sponsors for their faithful commitment despite the odds as well as to those who will present their work and to the participants: thanks to you all, we will have an exciting meeting and leave Lausanne with new knowledge, new ideas and enriched by our “live” discussions.

We hope that you will also find some time to walk around town or by the lake where a visit to the Olympic Museum and our Society's dinner will take place on Friday 18.

Enjoy your meeting in Lausanne!

Eliane Roulet Perez

C. Korff (Président de la SENP / SENP President), E. Roulet Perez (Présidente du comité local d'organisation / President of the local organising committee)

CONFÉRENCES / LECTURES

Modératerices / Chairs : E. Fazzi (Brescia, Italie), E. Roulet Perez (Lausanne, Suisse)

09h00 Langage et lésions cérébrales : est-ce que la nature, le moment d'apparition et la localisation des lésions sont importants ? / Language and brain lesions: are nature, timing and location of the lesion important ?
F. Liegeois (Londres, Angleterre)

09h40 Chirurgie de l'épilepsie et langage / Language and epilepsy surgery
C. Bulteau (Paris, France)

10h20 Pause café / Coffee break

Modérateurs / Chairs: C. Bulteau (Paris, France), A. De Saint Martin (Strasbourg, France)

10h50 Encéphalopathie développementale et/ou épileptique avec activation des pointes-ondes durant le sommeil : focus sur le langage / Developmental and/or epileptic encephalopathy with spike-wave activation during sleep: focus on language
I. Scheffer (Melbourne, Australie), E. Roulet Perez (Lausanne, Suisse)

COMMUNICATIONS ORALES / ORAL COMMUNICATIONS

Modérateurs / Chairs : C. Bulteau (Paris, France), A. De Saint Martin (Strasbourg, France)

11h30 **CO1** - Assessment of Executive Functions in preschool children with self-limited epilepsy: early screening to detect Attention Deficit Hyperactivity Disorder?
S. Uccella (Gênes, Italie)

11h45 **CO2** - Prevalence of elementary visuo-spatial perception deficit in children with neurodevelopmental disorders
S. Gonzalez Monge (Lyon, France)

12h00 **CO3** - Neurodevelopmental disorder in children affected by ocular albinism type 1
J. Galli (Brescia, Italie)

12h15 **CO4** - Expanding the phenotypic spectrum of Allan-Herndon-Dudley syndrome in a large cohort of MCT8-mutated patients
C. Sarret (Clermont-Ferrand, France)

12h45 Déjeuner / Lunch

Vendredi 18 Mars

SESSION POSTER FLASH / FLASH POSTER SESSION

Modérateurs / Chairs: A. Aeby (Bruxelles, Belgique), C. Newman (Lausanne, Suisse)

- 15h00 PF01 - Cerebellar heterotopia in a cohort of pediatric patients
L. Pasca (Department of Child Neurology and Psychiatry, IRCCS Mondino Foundation, and Department of Brain and Behavioral Sciences, University of Pavia, Pavia, Italy)
- 15h03 PF02 - Dravet Syndrome (DS): epileptic and neurocognitive outcome from childhood to adolescence
I. Turrini (Rome, Italie)
- 15h06 PF03 - CASK related disorder: influence of epilepsy on developmental outcome
I. Pisciotta (Gênes, Italy)
- 15h09 PF04 - Hemispheric surgery for severe epilepsy in very young children: results and considerations on a case series
G. Prato (Gênes, Italie)
- 15h12 PF05 - Early detection of neurodevelopmental risk in preterms based on neurovisual score naveg grid
L. Malerba (Brescia, Italie)
- 15h15 PF06 - Neuropsychological Rehabilitation with Virtual Reality (VR) technology in a randomized cohort of children with ADHD: Preliminary Results
S. Zambrano (Milan, Italie)
- 15h18 PF07 - Randomized comparative study of the management of dyslexia : speech therapy, versus, Proprioceptive and Speech therapy
L.M. Virlet (Lille, France)
- 15h21 PF08 - Pediatric Cerebral venous sinus thrombosis in PICU: study of 10 cases
D. Boumendil (Oran, Algérie)
- 15h24 PF09 - Neonatal cerebral sinovenous thrombosis (CSVT). To treat or not to treat? About our experience
M. Castro-Rey (Valladolid, Espagne)
- 15h30 Pause-café et visite des posters avec les auteurs / Coffee break and poster visit with authors

Vendredi 18 Mars

Friday, March 18th

THE CHILD'S LANGUAGE IN EXCEPTIONAL CIRCUMSTANCES

COMMUNICATIONS ORALES / ORAL COMMUNICATIONS

Modérateurs / Chairs : F. Rivier (Montpellier, France), R. Pressler (Londres, Royaume-Uni)

16h30	CO5 - Contributions of neuropathology and ultrastructural analysis to the pathophysiological understanding of storage diseases A. Gelot Bernabe (Paris, France)
16h45	CO6 - Structural brain abnormalities in epilepsy with myoclonic atonic seizures S. Lebon (Lausanne, Suisse)
17h00	CO7 - The epileptology of Aicardi-Goutières syndrome : electro-clinical phenotype and clinical-radiological correlation C. Varesio (Pavia, Italie)
17h15	Assemblée Générale de la SENP / SENP general assembly (17h15-18h15)
18h00	Visite libre du Musée Olympique (réservée aux participants du dîner de gala) Olympic Museum self-guided visit (for gala dinner participants only)
20h15	Dîner de gala / gala dinner (inscription obligatoire, registration is mandatory)

**EPISODES PAROXYSTIQUES CHEZ LE JEUNE ENFANT
PAROXYSMAL EPISODES IN YOUNG CHILDREN**

CONFÉRENCES / LECTURES

Modérateurs / Chairs : I. Scheffer (Melbourne, Australie), C. Korff (Genève, Suisse)

08h30	Epilepsie et troubles du mouvement chez le petit enfant : devons-nous garder ou ouvrir les frontières ? / Epilepsy and movement disorders in young children: should we keep or open the borders ? Sameer Zuberi (Glasgow, Ecosse)
09h10	EEG chez le nourrisson et le jeune enfant avec épisodes paroxysmatiques : contributions et pièges / EEG in newborns and young children with paroxysmal episodes : contributions and pitfalls Ronit Pressler (Londres, Angleterre)

COMMUNICATIONS ORALES / ORAL COMMUNICATIONS

Modérateurs / Chairs : I. Scheffer (Melbourne, Australie), C. Korff (Genève, Suisse)

09h50	CO8 - The neonatal presentation of BRAT1-related neonatal rigidity and multifocal seizure syndrome L. Vega (Bruxelles, Belgique)
10h05	Pause café / Coffee break

COMMUNICATIONS ORALES / ORAL COMMUNICATIONS

Modérateurs / Chairs : E. Fernandez (Barcelone, Espagne), Y. Chaix (Toulouse, France)

11h00	CO10 - Monogenic chorea aetiologies in children: a study of a cohort of 85 patients and a proposal of a diagnostic algorithm D. Doummar (Paris, France)
11h15	CO11 - Repetitive and stereotyped behaviors in neurodevelopmental disorders: more than a movement disorder S. Brunetti (Brescia, Italie)

11h30 - SYMPOSIUM SPONSORISÉ PAR L'INDUSTRIE

INDUSTRY SPONSORED SYMPOSIUM

12h30 Déjeuner / Lunch

**EPISODES PAROXYSMIQUES CHEZ LE JEUNE ENFANT
PAROXYSMAL EPISODES IN YOUNG CHILDREN**

CONFÉRENCE / LECTURE

Modérateurs / Chairs : R. Cilio (Bruxelles, Belgique), P. Veggiootti (Milan, Italie)

- 13h30 Dyskinésie, tics, stéréotypies : pas toujours facile ! / Dyskinesia, tics, stereotypies : not always easy !
Teresa Temudo (Porto, Portugal)

SESSION POSTER FLASH / FLASH POSTER SESSION

Modérateurs / Chairs: R. Cilio (Bruxelles, Belgique), P. Veggiootti (Milan, Italie)

- 14h10 PF10 - Encephalopathy with epilepsy and movement disorder related to RNF13: case report
C. Korff (Genève, Suisse)
- 14h13 PF11 - A case of vitamin-B6-dependent disorder presenting with abnormal eye-head movements and infantile spasms without hypsarrhythmia
J. Kalser (Lausanne, Suisse)
- 14h16 PF12 - Epileptic spasms in a patient with cerebral folate deficiency due to novel compound heterozygosity of FOLR1 gene
M. Papadopoulou (Thessaloniki, Grèce)
- 14h19 PF13 - A case report of PURA syndrome with late onset epileptic spasms
E. Crotti (Brescia, Italie)
- 14h22 PF14 - Abnormal eye movements and breathing irregularities: the first manifestations of Joubert syndrome in the neonatal period
V. Morabito (Bruxelles, Belgique)
- 14h25 PF15 - A novel X-linked mutation of CACNA1F gene in two male siblings presenting nystagmus
B. Bellini (Vérone, Italie)
- 14h28 PF17 - Vomiting and anorexia: a possible presentation of Alexander disease
D. Douummar (Paris, France)
- 14h31 Visite des posters avec les auteurs / Poster visit with authors

accreditation@uems.eu

Subject : EACCME® Accreditation of event reference #LEE19-01891

We are pleased to inform you that your application for EACCME® accreditation of
*48ème réunion de la Société Européenne de Neurologie Pédiatrique / 48th SENP meeting, Lausanne,
Switzerland, 17/03/2022-19/03/2022*

has been granted 13 European CME credits (ECMEC®s) by the European Accreditation Council for Continuing Medical Education (EACCME®).

Accreditation Statement

Accreditation by the EACCME® confers the right to place the following statement in all communication materials including the event website, the event programme and the certificate of attendance. The following statements must be used without revision:

"The *48ème réunion de la Société Européenne de Neurologie Pédiatrique / 48th SENP meeting, Lausanne, Switzerland, 17/03/2022-19/03/2022* has been accredited by the European Accreditation Council for Continuing Medical Education (EACCME®) with 13 European CME credits (ECMEC®s). Each medical specialist should claim only those hours of credit that he/she actually spent in the educational activity."

"Through an agreement between the Union Européenne des Médecins Spécialistes and the American Medical Association, physicians may convert EACCME® credits to an equivalent number of AMA PRA Category 1 Credits™. Information on the process to convert EACCME® credit to AMA credit can be found at www.ama-assn.org/education/earn-credit-participation-international-activities.

"Live educational activities, occurring outside of Canada, recognised by the UEMS-EACCME® for ECMEC®s are deemed to be Accredited Group Learning Activities (Section 1) as defined by the Maintenance of Certification Program of the Royal College of Physicians and Surgeons of Canada."

EACCME® credits

Each participant can only receive the number of credits he/she is entitled to according to his/her actual participation at the event once he/she has completed the feedback form. Cf. criteria 9 and 23 of UEMS 2016.20.

In order to help you issue individual certificates to each participants, please find below the breakdown of ECMEC®s per day:

17.03.2022	-	4.00
18.03.2022	-	4.00
19.03.2022	-	5.00

The UEMS-EACCME Secretariat

Formation

BRUXELLES

**Jazz Pharmaceuticals
has been at the forefront of
providing therapies and
support for our patients living
with serious, debilitating
neurological disorders.**

Through our acquisition of GW Pharmaceuticals, we are leaders in cannabinoid science and medicine. We provide novel, life-changing medicines for people living with serious conditions, and we continue to expand our reach and capabilities to discover and develop new therapies that help people redefine what is possible in their lives.
